

```
// C program to display "Hello World"

// Header file
#include <stdio.h>

// Constants

// Advantages / Disadvantages of Macros

// Code bloating

// main function -
// where the execution of program begins
int main( int argc, char *argv[] )
{
    // prints hello world
    printf("\n Hello World\n");

    // Special characters , escape sequences

    // Command line arguments

    // number of and type

    return 0;
}
```
