```c
#include <stdio.h>
int main()
{
    int x = 10, y = 5;

    printf("\n\n Before Swapping: x = %d, y = %d", x, y);

    // Code to swap 'x' and 'y'
    x = x * y;  // x now becomes 50
    y = x / y;  // y becomes 10
    x = x / y;  // x becomes 5

    printf("\n After Swapping: x = %d, y = %d", x, y);

    return 0;
}
```
